WHERE THE FUTURE OF  
GRAIN HANDLING IS BUILT.

# PATCHWORX

A grain distribution or other material handling business is part of a rugged industry with demanding industrial conditions. While sheet metal is one of the most durable materials for grain bins, it still endures significant daily wear and tear. This being the case, you don't want to pay for extensive repair or replacement any time a bin, tool or part of your building is damaged.

Rust is one of the primary causes of damage to sheet metal. Sheet metal can also develop holes due to accidents, weak spots or poor maintenance. Regardless of the type of damage, there are several options for patching or repairing these holes effectively.

Patchworx is an instant metal repair patch that is durable, flexible and waterproof. Patchworx will not rot or rust. Once applied and exposed to ultraviolet (UV) light, it starts to harden like steel within five minutes of activation. Save money and time by using Patchworx.

## PATCHWORX REPAIR PATCHES ARE AVAILABLE IN THREE SIZES:

- » SMALL PATCH: 3 INCHES BY 6 INCHES
- » MEDIUM PATCH: 6 INCHES BY 9 INCHES
- » LARGE PATCH: 9 INCHES BY 12 INCHES

## SIMPLE STEPS FOR APPLYING THE PATCHWORX UV REPAIR PATCH

1. CLEAN THE AREA TO BE PATCHED WITH A RAG AND WATER.
2. CUT THE PATCHWORX REPAIR MATERIAL TO FIT THE DAMAGED AREA AND PEEL TO REVEAL THE ADHESIVE BACKING.
3. APPLY THE MATERIAL EVENLY TO THE DAMAGED AREA AND APPLY HEAVY PRESSURE.
4. FOR CURING THE REPAIR PATCH, SIMPLY EXPOSE TO SUNLIGHT OR APPLY UV RAYS DIRECTLY FOR ABOUT FIVE MINUTES.
